DETAILED ACTION

Response to Amendment

1. This Office Action is in response to the amendment filed July 23, 2007, in which, applicant has cancelled claims 5, 11, 17, 20-25, 27-29, and 33.

Allowable Subject Matter

2. The indicated allowability of claims 2-4, 6, 8-10, 14-16, 18, and 21-32 is withdrawn in view of the newly discovered reference(s) to St. John (US Patent No. 6,463,415). Rejections based on the newly cited reference(s) follow.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2626

4. Claims 2-4, 6, 8-10, 14-16, 18, and 31-32 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-21 of U.S. Patent No. 6,463,415 in view of Upparulu.

5. The claims of 6,463,415 recite limitations for receiving voice signals, processing of the voice signals, determining the identity of the user via at least two voice authentication programs and determining the language of the user from the voice signals. The claims do not recite limitations for granting access for Internet use. Upparulu disclose a method for recognizing voice commands for manipulating data on the Internet, (col. 4, lines 37-51) comprising the steps of providing data on a website on the Internet, (Fig. 1, element 101 "Internet"); receiving voice signals from a user accessing the website, (col. 4, line 37 continuing to col. 5, line 2; col. 7, line 5 continuing to col. 9, line 2); interpreting the voice signals of the user for determining navigational command, (col. 4, line 37 continuing to col. 5, line 2; col. 7, line 5 continuing to col. 9, line 2); outputting selected data of the website based on the navigational commands, (see Fig. 1, element 102 "Voice Web Site" and element 106 "Voice Web Browser"; col. 4, line 37 continuing to col. 5, line 2; col. 7, line 5 continuing to col. 9, line 2). It would have been obvious to one of ordinary skill at the time of the invention to modify the system for implementation of the at least two voice authentication algorithms processing for Internet authorization, for the purpose of establishing the identity of a speaker via voice authentication for authorized access that is more reliable and more efficient.
